Subject X.500 is and ISO standard not X/Open

Description of Problem or Suggestion:

On the top of 6.24, there is a reference to "X/Open's X.500). This is incorrect and should modified to show that X.500 is an ISO/CCITT standard. Also the X.500 version number should be stated.

It would be appropriate to make reference to X/Open's Federated Naming Standard in this section as it is discussed in the CSS Directory Service Design Specification document (and in fact on the next page).
